PS: The sticker on the initial panel marked each function and description of each key. It can be removed after you are familiar with the operations.

Pour over coffee precisely with a Weighing Panel

Steps and data below are just for your reference and it is variable according to the actual steps.

01

Turn on the scale and put Brewers on the scale. Stature paper filter and tare it.

02

Pour ground coffee, meanwhile check the actual weight.

03

Tare again and let us brew now.

04

Short Press to start timing which helps you control the time of blooming and pouring.

05

After brew is finished, short press to stop timing. Weighing panel shows your brewing data precisely.

Note

1. The surface of scale is waterproof. But DO NOT make liquid enter the gap between shells and charging port.
2. Place it on a horizontal and smooth surface.
3. Do not use during charging.
4. This product is powered by a lithium battery. DO NOT charge after its power is used up. It is recommended to charge it in time after you use it.
If the battery is used up, there will be 10 min protection time during which you are not able to start it.
5. When timing is off, it will standby 3 min then shut down automatically.
When timing is on but there is no change of weight, it will shut down in 15 min.
6. The surface of scale is waterproof. But DO NOT make liquid enter the gap between shells and charging port.
7. The internal structure of the equipment is precise and it is prohibited to uninstall it.
8. It is 1 year warranty except private uninstallation or human damage.
9. It is an accessory for coffee brewing. DO NOT use it for trade settlement and other occasions.

If customers are against the notes above, the device may be broken or get inaccurate data etc. and we will NOT be responsible for it.
